Chapter 4 Forces and Newton's Laws of Motion 52 (d) Since the box starts from rest on the ground, we can write $\Delta x = a_x t^2$ and $\Delta y = a_y t^2$ Substituting for a_x and a_y , we get $(1.5 / 2) \Delta x = m s^2 t$ and $(2.0 / 2) \Delta y = m s^2 t$ Solving both sides for t and setting the equations equal to each other yields $y / x = 3 / 4$ $1.5 / 2.0 =$
