Api 521 5th Edition - abcd.rti.org

Background: The API 521 5th edition section 5.15.7.4 about fire relief calculations for liquid air coolers indicates the use of Equations (6) and (7) with applying an exponent of 1.0 to the wetted area term. Now when applying this rule we discovered a significant difference in the result depending on the selection of the units, either SI or USC.

Pressure Safety Valve (PSV) Sizing Tutorial - API 520/521/526

In the API 521 (fifth edition, para 5.14.4.1), there is a formula to calculate the final pressure of trapped liquid for thermal expansion case. I have two questions; I want to use this formula and justify that for my case, athermal relief valve is not required due to huge difference between maximum operating pressure (3.5 barg) and design pressure (100 barg) of pipe.

Yes mohsekalantar, I really know what I want: the current edition of API STD 521 (6th Ed., 2014). Please refer to: [link Point to another website Only the registered members can access]. I've already read the 5th Edition of API STD 521 + Errata 1 + Addendum 1, and I've been using it for 8 years. Now that it has been superseded and replaced, I would prefer to use the new Edition.

API STD 521 6th Edition (2014) - Petroleum Community Forum

API STD 521, Pressure-relieving and Depressuring Systems,is perhaps the most thorough published guidelines on how to size relief devices and flare systems. This paper reviews the differences between the 6thEdition of API STD 521 (Published in 2014) and the 5thedition (Published in 2007).

Abstract: Changes Between API STD 521 6th Ed and 5th Ed ...

Hi all, I just came across section 4.3.2 - Closed outlet on vessels, of API RP521 - 5th edition. I'm a little bit confused. First it is stated: "If the pressure resulting from the failure of administrative controls can exceed the corrected hydrotest pressure, reliance on administrative controls as the sole means to prevent overpressure might not be appropriate."
