In my major, electrical engineering, we get our fair share of these subjects but I want more. I decided that electrical engineering does not go indepth enough for me and applied math does. However, going from a bachelor in EE to a master's in Applied Math likely will not be without a bit of trouble.

A math major (with operations research background) would be considered as well as the engineering major.

Maybe if you the area is in EE and the project needs someone with computational electromagnetics background, then a math or physics major would also be considered.
