Create and initialize a counter output channel to produce a pulse in terms of frequency using the DAQmx Create Channel VI. Select appropriate inputs for Duty Cycle, Frequency, Counter(s), Idle State and Initial Delay. 2. Use the DAQmx Timing VI to configure the duration of the pulse generation.

Advanced Data Acquisition Series - Pulse Width Modulation ...

Tip You can create a directory on disk named the same as the LabVIEW class to save the class library file, class member VIs, and class custom default probes. You can include the files that the class library owns in the directory. If you include files for more than one class library in the same directory, conflicts might occur if you try to include VIs of the same name in different class libraries.

Creating LabVIEW Classes - LabVIEW 2018 Help - National ...

This labview tutorial covers following topics: Labview data types. Creating SubVI. Creating Array and Array operations. Cluster concepts in labview. Various plots in labview. File I/Os. For loop, while loop and case structure. Local variable vs Global variable concepts.
