Taxonomy or Plant Systematics, despite what people would have you believe, really is not an exacting science in many ways • This statement mainly applies to the identification process, so well start there. • Identification is very different from classification, which is even more problematic • There are several methods for identifying plants

TAXONOMY: THE STUDY OF IDENTIFICATION, CLASSIFICATION, AND ...

Violaceae is a family of flowering plants established in 1802, consisting of about 1000 species in about 25 genera. It takes its name from the genus Viola, the violets and pansies.. Older classifications such as the Cronquist system placed the Violaceae in an order named after it, the Violales or the Parietales.However, molecular phylogeny studies place the family in the Malpighiales as ...

Violaceae - Wikipedia

The specimens that are stored can be either the whole plant or a part of the plant, for example, leaves, flowers etc. To ensure maximum shelf life for the stored specimen, it is of extreme significance that a proper method is followed. Usually, the plant or its parts after collecting are cleaned and dried before mounting on sheets of paper.

Taxonomical Aids - CoolGyan.Org

Biological classification is a scientific process that illustrates the arrangement of living organisms in accordance with their shared characteristics. It is also referred to as Taxonomy. Every living being on the planet is divided into five kingdoms. They are- Monera, Protista, Fungi, Plantae and Animalia.
